

# Case Study

## Lymm High School

When Lymm high school extended its fitness facilities to include a new cardio, free weights area and changing facilities, Avonics took the opportunity to provide a complete audio solution throughout the entire leisure centre complex.

All the areas of the centre are now integrated into a complete system that provides local systems to suite each area, while allowing paging and music sources to be linked throughout the complex.

The Gym and free weights:

- Multiple TVs showing free to air digital channels
- Personal headphone distribution system
- Quality ceiling mounted speakers
- Personal viewing screens on treadmills & bikes

The pool area:

- Wireless headset microphone for the aquarobics instructor
- iPod docking facility with remote control on the poolside
- New speakers & amplification

Studio Area:

- Sound system suitable for aerobics, drama and dance classes

Sports Hall:

- Re configure existing system to allow portable rack to be used for classes, exams and awards evenings.

Changing rooms & public areas:

- Audio system throughout all the changing and public areas to provide background music and paging announcements.
