

Avonics WORLD CUP 2010 package offer

Sanyo 42LH2WP external LCD screen

SANYO's amazing new super slim 42" LCD Panel is the UK's first weather-resistant TV display.

SANYO has used all of its expertise in creating a lightweight aluminium framed LCD display which is protected by an acrylic front panel. This means that the SANYO Weatherproof panel can be used in a wide variety of exterior environments due to it being fully IP56 weather-resistant approved. The SANYO Weatherproof LCD will also make the ideal display for pub courtyards and gardens, perfect due to the no-smoking laws.

The 42LM5WP is a 42" weatherproof monitor which includes a tough anodized aluminium bezel with integrated heat sync that allows the display to operate without external ventilation. This enables the display to secure an IP66 rating rated, and facilitates use in hostile conditions which would cause a standard display to fail. Such conditions include exposure to water, oil, dust and other debris as well as to corrosive substances such as solvent based products and salt water. An anti-reflective tempered glass covers the LCD providing both protection and reducing reflection by 90%. In addition the temperature management capabilities allow the display to operate within a temperature range of -20 to 45 degrees Celsius, significantly outside the operating range of a standard LCD panel. This display benefits from DVI, VGA and full RGBHV inputs.

Features

- **W-XGA Resolution (1366 x 768)**
- **DVI-D (HDCP) HD Ready**
- **Anti Reflective Tempered Glass**
- **IP66 Rated**
- **Operating Temperature -20° to +45°C**
