

Designer audio system

The APART PUBSET-2000BL is a complete and extremely powerful compact audio system that is suitable for bars, pubs, restaurants, taverns, clubs, sports centres and others. The PUBSET system is a perfectly balanced audio system. The sound quality, exceptional long-term reliability and above all affordable price will ease your search for a complete audio solution for applications from back ground music up to "dance level" music.

PUBSET-2000

The heart of the system is the PUBDRIVE-2000; a 3 channel amplifier. It has a subwoofer channel and a left & right channel output to drive the satellite loudspeakers. The build-in X-overs and AP® limiter together with the quality of the oversized components, make this amplifier fail-proof. The integrated processors allow a custom-build and personal sound adjustment.

The two passive bandpass subwoofers (Ref.: SUB2400) have an incredible bass response compared to their small size. This small size makes it easy to hide or integrate the subwoofers into the interior. The 10" dual coil woofers supply you with a punchy and powerful bass. The Auto Reset protection system inside contributes to the system's reliability.

Last but not least, the MASK8BL Top loudspeakers perfectly match with these SUB2400's. These wooden top cabinets have a HiFi sound that comes close to studio monitor quality, even at High power levels. The loudspeakers are available in black and white. The 3-step Protection Guard® with Auto Reset function makes sure the loudspeakers won't break down.

The extended protection systems that have been integrated in all components (subwoofers, satellites and amplifier) and the fact that loudspeakers and amplifier have been developed to be used together, result in a fail-safe sound system, 24 hours a day, 7 days a week.

This way people in the venue can enjoy a dynamic sound quality. On the other hand, the people who have installed the system can enjoy their quiet and silent nights without urgent service interventions!
