

## AirLine 77 aerobic wireless microphone system

Airline77 is the newest version of the Airline series that features the first micro-technology transmitters in the industry. With Airline there are no belt-packs and no cables to hinder the performer - just complete freedom of movement.

The **AH1QE** headset mic was designed to go around the back head rather than over the top. This allows the miniature transmitter to be attached directly to the headband, out of the way and completely unobtrusive, while being comfortable and secure during performances or exercise routines.

The **CR77** true-diversity half-rack UHF receiver features a front panel display with large multi-segment Audio level and RF level LED meters, and a large rotary volume knob allows easy adjustment of audio output.

# SAMSON

AIRLINE 77 AEROBICS SYSTEM (AH1/QE/CR77)

true wireless system because there are no belt packs and no cables

Traditional wireless systems consist of belt packs and wires that hinder the performer. With AirLine, you get a true wireless system because there are no belt packs and no cables, allowing the user complete freedom.

The AirLine headset transmitters feature the Samson Qe Fitness and Qv Vocal microphone elements.
