

# Concert 77 aerobic wireless microphone system

The Concert 77 Fitness System is a high-performance UHF wireless solution that's ideal for fitness instructors looking for clear vocal reproduction while keeping their hands free.

Featuring the SE10, a low profile, omnidirectional headworn microphone that provides outstanding audio reproduction, making it perfect for fitness and other vocal applications.

The SE10 can be easily shaped to fit the left or right ear and the unique retaining band holds the mic in place even when used in fitness applications. Thanks to the omnidirectional pickup pattern, the SE10's off-axis frequency response is linear, resulting in a clear and articulate reproduction, regardless of the position of the capsule relative to the sound source.

The SE10 has also been specially treated with a water resistant coating, providing extra protection from sweat and other moisture. Additionally, there is a moisture-guard drip ring to further protect the capsule and ensure reliable performance.

The CR77 true-diversity half-rack UHF receiver is at the core of the system. A synthesized PLL frequency control circuitry keeps the signal locked and true while dual tuned molded antennas with LEDs monitor the true-diversity operation.

The CR77 features a front panel display with large multi-segment audio level and RF level LED meters, and a large rotary volume knob allows easy adjustment of audio output. Its rear panel features balanced XLR and unbalanced 1/4-inch outputs allowing flexible connection options. Where two wireless systems are required, two CR77 receivers can be rackmounted together in a single-space rack adapter available as an additional accessory.

With the Concert 77 Fitness System, advanced technology and total convenience combine to provide professional wireless performance for fitness professionals that's always reliable and lets you focus on instruction.

## SAMSON

CONCERT 77 - FITNESS SYSTEM - WITH Se10

SE10 - Headworn Condenser Microphone

### Specification:

- High-performance UHF true diversity wireless system
- Phase-Locked Loop (PLL) circuitry for flawless reception
- Locking Mini-XLR connector for all systems
- Balanced XLR and 1/4" output jacks
- Front panel power switch, RF level meter and squelch control
- Mute switch, gain control
- 9-Volt battery operation, LED battery level meters
- Includes SE10 Headworn Microphone

### SE10 - Headworn Condenser Microphone:

The SE10 is a low profile, headworn, micro-miniature condenser microphone with a 3mm capsule. Its excellent audio reproduction makes it perfect for spoken word, fitness and other vocal applications.

The microphone can be easily shaped to fit the left or right ear and the unique retaining band holds the mic in place even when used in fitness applications. Plus, the omnidirectional pickup pattern results in a clear and articulate reproduction, regardless of the position of the capsule relative to the sound source. Its water resistant coating also provides protection from sweat and other moisture during high-energy performances.

The SE10 is particularly well suited for use with Samson wireless systems. And with four included adapters, the microphone can be used with most any other manufacturer's wireless belt-pack systems. Manufactured with extreme care and the highest quality components, the SE10 delivers exceptionally clear, articulate sound with reliable performance in an extremely low profile design.
