

# Trantec radio microphone

The S4.4W Trantec wireless microphone system provides fitness and aerobic facilities with the smartest choice for all their wireless needs. The system can offer a choice of 4 selectable frequencies on UHF band 863-865MHz (licence exempt) which you can operate up to 4 systems to work simultaneously.

The Trantec S4.4W comes with our popular Hm66 Aerobic headworn microphone. This heavy duty waterproof microphone is designed for years of rugged use.

The adjustable gooseneck boom is sealed for protection against water, dust, and perspiration. It is surprisingly light and flexible for a comfortable fit. It has an adjustable headband for secure placement during the most rigorous exercise routines, also available in a choice of three colours Black, Blue & Yellow. Also included with the system is our neoprene belt, which provides freedom of movement and protects your transmitter.

This selectable frequency system allows for operation even in larger cities where broadcast interference and other wireless systems can create problems, making the Trantec S4.4 the idea choice for fitness and aerobic facilities.

The Trantec S4.4W is also available with the popular Hm33 Aerobic headworn microphone. **The TS-33** has been designed primarily for the active professional who needs hands-free operation. Suitable for people in the sports, journalism, event organizers, transportation, warehousing and restaurant industries where actions are demanded.

The microphone capsule and boom are moisture protected by moulded injections. Various accessories are available as optional add-on. Aradio connector is supplied to match the user's portable radio.
